Education

Rizal Technological University

Bachelor of Science in Computer Engineering

Aug 2022 – July 2026

Maybunga, Pasig

Relevant Course Work

- Data Structure and Algorithms
- Object Oriented Programming
- Software Design
- Embedded Systems

Experience

Q Asia Magazine Inc.

Information Technology Intern

Feb 2026 – April 2026

Mandaluyong City

- Developed an automated email outreach application using Python, CustomTkinter, and FastAPI, streamlining bulk client campaigns and removing manual outreach overhead.
- Programmed dynamic data parsing engines to handle recipient databases in Excel and CSV formats, automatically generating tailored HTML invitation templates.
- Integrated security and reputation controls, including PIN-based authorization, batch throttling to prevent email spam flags, and an interactive browser-based previewer.

Technical Projects

AniVerse - Anime Discovery and Streaming Platform (Full Stack)

- Built and deployed a full-stack anime discovery web app using Next.js, TypeScript, FastAPI (Python), and MongoDB on Vercel.
- Aggregated anime metadata by integrating AniList (GraphQL), Jikan/MAL, and Playwright scraping into a unified search/discovery experience.
- Improved backend stability and performance by isolating scraping in subprocess jobs and adding caching/merge logic with rate-limit handling.

Vitae - AI Resume Builder (Full-Stack, AI)

- Developed a production-grade resume builder using Next.js (App Router), TypeScript, Supabase Auth/Postgres, and Prisma with editing, autosave, templates, and versioning.
- Shipped AI features (rewrite, ATS scoring, job-match, cover letters) with a Groq + OpenRouter dual-provider architecture for reliability.
- Strengthened security with Upstash rate limiting, strict input validation, prompt-injection guardrails, and authorization-safe database updates.

Onyx - AI Design System Generator (Frontend Design + AI)

- Built an AI-powered design system/landing page generator using Next.js, React, TypeScript, and Tailwind CSS that outputs structured design tokens.
- Implemented a template-routing system that selects from multiple layout archetypes to reduce repetitive UI and improve variety.
- Delivered a polished preview experience with Framer Motion, reusable components, and dynamic asset integration.

Technical Skills

Languages: Basic Knowledge with HTML/CSS, Javascript(React/Next.js), C++/Arduino, C#, Python, TypeScript

Developer Tools: VS code & Visual Studio, Antigravity, Arduino IDE, Thonny, ThinkerCad

Interest: Web Development, Robotics and Gaming
